

## GENERAL CHARACTERISTICS

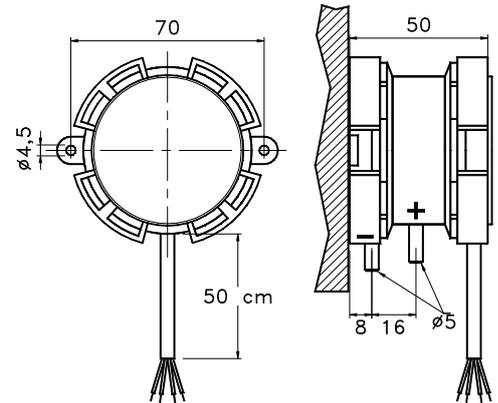

For all applications where it is necessary to detect and electrically convert differential pressure measurements of non-aggressive gases. The differential pressure is introduced via two hose (∅ 5 mm) in the measurement chamber, separated into two parts by a rubber diaphragm. The displacement of the diaphragm is inductively detected and converted into an electrical signal, voltage or current. The electronic circuit is completely separated from the pressure chamber. All instrument components are housed in a plastic enclosure with degree of protection IP65.

- Measuring ranges from 50 to 10000 Pa
- Linearity and hysteresis 0.5%
- Output 0-10V, 4-20mA.
- Easy to Install.
- Degree of protection IP65

## DIFFERENTIAL PRESSURE RANGES Tab.1

ΔP measuring ranges	Max static pressure		Code
	Pa	Bar	
0 - 50	0,2	0005	
0 - 100	0,2	0010	
0 - 200	0,2	0020	
0 - 500	0,2	0050	
0 - 1000	0,2	0100	
0 - 2000	0,2	0200	
0 - 4000	0,2	0400	
0 - 6000	0,2	0600	
0 - 10000	0,2	1000	

## TECHNICAL DATA Tab.2

Description	2-wires circuit	3-wires circuit	Code
Power supply	-	24Vac / 24Vdc	2510
Output signal	-	0 - 10 V	
Power supply	12 - 30 Vdc	-	2511
Output signal	4 - 20 mA	-	
Measuring element	Rubber diaphragm - calibrated spring		-
Zero error	± 0,75%		-
Linearity + hysteresis	± 0,50%		-
Zero thermal drift	± 0,30%   10K		-
Field thermal drift	± 0,20%   10K		-
Working temperature	0 ÷ 50°C		-
Electrical connection	3 (4) poles cable	500 mm	-
Body	Ultramid / black ABS		-
Degree of protection	IP65		IP65

Options				Code
Indicator	LCD - 3 digit - 9 mm			1
Switch output	Open collector	24V	50mA max	2 2510 only
Adjustment	Potentiometer	0 - 100% Scale		
Hysteresis	Adjustable	0,25 - 5%		
Delay	Adjustable	0 - 7 Sec.		
Function	To be specified	Min	Max	
Measuring range	Non standard			3
